CAREER SUMMARY

I Am a web designer and developer with more than 2.5 + years of practical experience (from March 2024 to the present), specializing in the creation of modern, responsive, and user-friendly websites. I have skills in both the design and development of static and fully dynamic websites using HTML, CSS, JavaScript, Bootstrap, and PHP. I have experience in communicating directly with clients, gathering their requirements, and providing customized solutions. On my own, I have developed complete e-commerce websites — covering everything from product listings to order and delivery management — including the integration of the Razorpay payment gateway. I actively make use of AI-assisted development tools such as Claude AI in order to speed up the processes of coding, debugging, and content creation, as well as to continually improve my skills in full-stack and app development.

WORK EXPERIENCE

Web Designer & Developer | *AbtusWorld Company* March 2024 – Present

- Designed and developed static and dynamic websites using HTML, CSS, JavaScript, Bootstrap, and PHP, ensuring cross-browser compatibility and mobile responsiveness.
- Collaborated directly with clients to gather requirements, translate business needs into technical solutions, and deliver fully Customized websites on schedule.
- Built end-to-end e-commerce platforms from scratch — covering product catalogue, shopping cart, checkout, and order management systems.
- Integrated Razorpay payment gateway to enable secure, seamless online transactions, improving checkout reliability and customer trust.
- Optimized website performance and UI/UX, ensuring fast load times and a consistent, user-friendly experience across all devices and screen sizes.
- Leveraged free AI tools, including Claude AI, to accelerate coding, debugging, and testing — cutting delivery timelines and consistently completing projects ahead of schedule.

KEY PROJECTS

E-commerce Website Development /

- Built a complete e-commerce platform with product listing, cart, and order management.
- Integrated Razorpay payment gateway for secure, seamless online payments.

Dynamic Business Website with Admin Panel/

- Developed a PHP-based dynamic business website with a custom admin panel.
- Managed website content, user accounts, and backend data.

Multiple Client Websites /

- Designed and delivered responsive, user-friendly websites for direct clients based on individual requirements.

Live Client Websites

1. dugarsfood.com 2. rkumarlawchambers.com 3. armasnaturals.com 4.idgllab.com 5. arveendexport.com 6. aicamsr.com

7. 3bpackaging.ca 8. khudiram.in, More ……

TECHNICAL SKILLS

- **Frontend Development:** HTML5, CSS3, JavaScript, Bootstrap, Responsive Web Design, UI/UX Design
- **Backend Development:** PHP, Laravel, Dynamic Website Development, Admin Panel Development
- **Database:** MySQL
- **E-commerce Development:** Shopping Cart, Product Management, Order Management, Razorpay Payment Gateway
- **AI-Assisted Development:** Claude AI and other AI tools for coding, debugging, code optimization, and development workflows
- **Skills:** React, WordPress, Adobe Photoshop

EDUCATION

- Professional Course: Website Designing & Development Arena Animation 2023-2024
- Bachelor's Degree (B.A. Hons, History) - Patliputra University, Patna 2022
- Intermediate (12th) Bihar School Examination Board (BSEB), Patna - 2019

ACHIEVEMENTS

- Successfully delivered multiple client projects on time and independently.
- Built fully functional e-commerce websites from concept to deployment.
- Managed direct client communication and end-to-end project delivery.

NOTE: DEVELOPMENT SPEED & THEME CONVERSION

- **Static Website Development:** Able to design and complete 5–7-page responsive static websites within 3–4 hours when all required content and images are provided.
- **Theme Conversion:** Experienced in converting HTML templates and ready-made website themes into PHP, Laravel, and other frameworks, with an estimated turnaround of 2 hours for suitable projects
- **Multi-Framework Development:** Capable of adapting and converting website themes from platforms such as HTML template marketplaces and Google search results into different frameworks.
- **AI-Assisted Development:** Use AI tools to accelerate theme customization, code conversion, debugging, and website development while maintaining responsive design and functionality.
